

REPLIT PROMPT — YachtWorth: Yacht Proposal Builder

CONTEXT

Build a new tool "Yacht Proposal" inside the existing YachtWorth app. Entry point: Tools tab → new card "Yacht Proposal · PDF specification sheet". This tool generates a professional multi-page PDF document with complete yacht specifications. Data source: My Yacht profile (primary) or manual entry. NO AI text generation — this is a structured document builder, not a text generator.

WHAT THIS TOOL DOES

Takes all data from the yacht profile (specs, equipment, photos, pricing) and generates a professional 4-page PDF proposal document:

- **Page 1** — Cover: large photo, yacht name, key specs, price
- **Page 2** — Technical specifications + accommodation layout
- **Page 3** — Complete equipment list by category
- **Page 4** — Pricing (sale + charter) + broker contact + notes

The broker sends this PDF to potential buyers or charter clients.

NAVIGATION

Tools tab

- Yacht Proposal (YachtProposalScreen.js)
 - YachtSelectorSheet (reuse existing)
 - ProposalSettingsScreen
 - ProposalPreviewScreen (shows PDF preview)
 - PDF export / share
-

SCREEN 1: ENTRY

YACHT PROPOSAL

Professional specification document

WHICH YACHT?

[Select from My Yacht ▼]

— or —

[Enter manually]

PROPOSAL TYPE:

[For Sale] [For Charter] [Both]

SCREEN 2: PROPOSAL SETTINGS

All fields pre-filled from My Yacht if selected. All editable.

PRICING

PROPOSAL TYPE *

[For Sale] [For Charter] [Both]

ASKING PRICE (if for sale)

[] €

☐ Price on application (hide price)

CHARTER RATE — HIGH SEASON (if for charter)

[] € / week

CHARTER RATE — LOW SEASON

[] € / week

APA %: [] (default 30%)

☐ Charter rate on application

CHARTER AREA

[Mediterranean] [Caribbean] [Northern Europe]

[Asia-Pacific] [Middle East] [Worldwide]

MYBA CONTRACT: [Yes] [No]

[Scrollable PDF preview]

4 pages shown as image thumbnails

User can tap any page to see full size

[ Share PDF] [ Copy link] [ Save]

Share PDF → native share sheet, sends the PDF file **Copy link** → future feature (coming soon) **Save** → saves to Supabase, accessible from Profile

PDF TEMPLATE

Use the attached file `yacht_proposal_template.html` as the EXACT visual template.

Template structure (4 pages):

Page 1 — Cover

- Background: #0D1B2A full page
- If yacht has photo → full-width cover photo (top 185mm)
- If no photo → dark gradient placeholder with anchor icon

- Gradient overlay over bottom of photo
- Yacht name large (40pt, weight 300, white)
- Builder · Model · Year subtitle
- Gold horizontal line (60px wide)
- Key specs row: Length · Guests · Flag · Home base
- Price row bottom: Asking price in gold OR charter rate
- Document type + date top right

Page 2 — Technical Specifications + Accommodation

- Inner header: YachtWorth brand + yacht name
- Gold gradient line
- Technical specs in 3-column grid (Builder, Model, Year, LOA, Beam, Draft, Displacement, Hull material, Hull type, Engines, Total HP, Engine hours, Max speed, Cruise speed, Range, Fuel capacity, Water capacity, Flag, Reg. number, IMO, VAT status, Home base, Operating area)
- Accommodation: cabin cards grid (2 columns) Each card: cabin type, location, bed configuration, amenities

Page 3 — Equipment & Systems

- Inner header
- Equipment by group — each group has a bold label + tag pills:
 - Power & Electrical (generators highlighted if present, stabilizers highlighted)
 - Navigation & Communication (Starlink highlighted if present)
 - Comfort & Climate
 - Water Systems (watermaker highlighted if present)
 - Safety
 - Water Toys & Tenders (tenders and jet skis highlighted)
 - Deck & Anchoring
 - Sailing equipment (only if sailing/catamaran)

- Only show groups that have at least one item enabled
- Highlighted tags (dark background, gold border): items flagged as notable (generators, stabilizers, Starlink, watermaker, tenders, jet skis)

Page 4 — Pricing & Contact

- Sale + Charter side by side (2 columns)
- Notes section
- Broker contact dark box (navy background)
- Footer disclaimer + YachtWorth brand

DATA MAPPING

Map yacht profile fields to PDF template:

```
function buildProposalData(yacht, equipment, settings) {
  return {
    // Cover
    yachtName: yacht.name,
    builderModel: `${yacht.builder || ''} ${yacht.model || ''}`.trim(),
    year: yacht.year_built,
    type: yacht.yacht_type,
    photoUrl: yacht.cover_photo_url || null,
    photoUrls: yacht.photo_urls || [],

    // Specs grid
    specs: {
      builder:      yacht.builder,
      model:        yacht.model,
      yearBuilt:    yacht.year_built,
      loa:          yacht.length_m ? `${yacht.length_m} m` : null,
      beam:         yacht.beam_m ? `${yacht.beam_m} m` : null,
      draft:        yacht.draft_m ? `${yacht.draft_m} m` : null,
      flag:         yacht.flag,
      regNumber:    yacht.registration_number,
      imoNumber:    yacht.imo_number,
      vatStatus:    yacht.vat_status,
      homeBase:     yacht.home_port,
      operatingArea: settings.charterArea,
      engines:      yacht.engine_maker && yacht.engine_model
                    ? `${yacht.engine_count || ''} × ${yacht.engine_maker} ${y
```

```

        : null,
    totalHP:      yacht.total_hp ? `${yacht.total_hp} HP` : null,
    engineHours:  yacht.engine_hours_current ? `${yacht.engine_hours_current}
},

// Accommodation
guestCabins:    yacht.guest_cabins,
crewCabins:     yacht.crew_cabins,
totalBerths:    yacht.berths,
heads:         yacht.heads,

// Equipment (from yacht_equipment table)
equipment:      groupEquipmentByCategory(equipment),

// Pricing
proposalType:   settings.proposalType,
askingPrice:    settings.askingPrice,
priceOnApp:     settings.priceOnApplication,
charterHigh:    settings.charterRateHigh,
charterLow:     settings.charterRateLow,
apaPercent:     settings.apaPercent,
charterOnApp:   settings.charterOnApplication,
mybaContract:   settings.mybaContract,

// Broker
brokerName:     settings.brokerName,
brokerage:      settings.brokerageName,
email:          settings.email,
phone:          settings.phone,
website:        settings.website,

// Notes + meta
notes:          settings.notes,
language:       settings.language,
confidential:   settings.confidential,
date:           new Date().toLocaleDateString('en-GB', { month: 'long', year:
});
}

function groupEquipmentByCategory(equipmentRows) {
    // Group yacht_equipment records by category field
    // Return object: { power_electrical: [...], navigation: [...], ... }
    const groups = {};
    for (const item of equipmentRows) {
        if (!groups[item.category]) groups[item.category] = [];
        groups[item.category].push({
            label: formatEquipmentLabel(item),

```

```

        highlight: isNotableEquipment(item.equipment_type),
    });
}
return groups;
}

function isNotableEquipment(type) {
    // These get gold highlighted tags
    const notable = ['generator','stabilizer','starlink','watermaker',
        'tender','jetski','gyro_stabilizer','vsat'];
    return notable.includes(type);
}

function formatEquipmentLabel(item) {
    // e.g. "2 × Northern Lights generators (12 kW each)"
    // e.g. "Seakeeper 9 gyro stabilizer"
    // e.g. "Spectra Newport 400 watermaker (400 L/hr)"
    let label = '';
    if (item.quantity > 1) label += `${item.quantity} × `;
    if (item.brand) label += item.brand + ' ';
    if (item.model) label += item.model + ' ';
    label += item.equipment_type.replace(/_/g, ' ');
    if (item.power_kw) label += ` (${item.power_kw} kW)`;
    if (item.capacity_liters) label += ` (${item.capacity_liters} L/hr)`;
    return label.trim();
}

```

HTML TEMPLATE BUILDER

```

import * as Print from 'expo-print';
import * as Sharing from 'expo-sharing';

export async function generateProposalPDF(data) {
    const html = buildProposalHTML(data);

    const { uri } = await Print.printToFileAsync({
        html,
        base64: false,
        width: 595,    // A4 points width
        height: 842,   // A4 points height
    });

    return uri;
}

```

```
function buildProposalHTML(data) {
  // Take yacht_proposal_template.html as base
  // Replace all {{VARIABLE}} placeholders with real data
  // Conditionally show/hide sections based on what's available
  // Return complete HTML string

  return `<!DOCTYPE html>...`; // full template with data substituted
}
```

Key conditional rendering rules:

```
// Cover photo: show if available, otherwise dark placeholder
const coverPhotoHTML = data.photoUrl
  ? ``
  : `<div class="cover-photo-placeholder"><span>⚓</span></div>`;

// Price on cover: show asking price if sale, charter rate if charter only
const coverPriceHTML = data.proposalType === 'charter'
  ? `<div class="cover-price-label">Charter from</div>
    <div class="cover-price-value">€ ${fmt(data.charterHigh)} / week</div>`
  : data.priceOnApp
  ? `<div class="cover-price-label">Asking Price</div>
    <div class="cover-price-value">Price on application</div>`
  : `<div class="cover-price-label">Asking Price</div>
    <div class="cover-price-value">€ ${fmt(data.askingPrice)}</div>`;

// Specs: only show rows where value is not null
// Equipment: only show groups that have items
// Sale section: only show if proposalType includes sale
// Charter section: only show if proposalType includes charter
// Broker box: only show if brokerName is provided
```

PHOTO PAGE (optional — Page 3b)

If yacht has 2+ photos, add an extra page between equipment and pricing:

PHOTOGRAPHY

[Photo 1]	[Photo 2]
[Photo 3]	[Photo 4]

2x2 grid, each photo 55mm tall. Caption below each if provided. Only generate this page if
`yacht.photo_urls.length >= 2`.

SAVED PROPOSALS

Save generated proposals to Supabase:

```
create table if not exists proposals (  
  id uuid primary key default gen_random_uuid(),  
  user_id text not null,  
  yacht_id uuid references yachts(id) on delete set null,  
  yacht_name text not null,  
  proposal_type text,  
  language text,  
  pdf_url text,  
  settings_snapshot jsonb,  
  created_at timestamptz default now()  
);
```

Access from Profile tab → My Proposals section. Each saved proposal: yacht name, type, date, language. Tap → re-open and re-export.

TOOLS TAB UPDATE

Add new card to Tools list:

```
{  
  id: 'yacht_proposal',  
  icon: 'file-text',  
  title: 'Yacht Proposal',  
  subtitle: 'Professional PDF specification sheet',  
  roles: ['Owner', 'Broker'],  
  status: 'LIVE', // after deployment  
}
```

FILE STRUCTURE

```
/screens/YachtProposal/
```

```
YachtProposalScreen.js      ← entry + yacht selector
ProposalSettingsScreen.js   ← pricing, broker, settings
ProposalGeneratingScreen.js ← loading
ProposalPreviewScreen.js    ← preview + share

/utils/
proposalBuilder.js          ← data mapping + HTML builder
proposalPDF.js              ← expo-print PDF generation

/templates/
yacht_proposal_template.html ← visual HTML template (attached)
```

PRIORITY BUILD ORDER

1. `proposalBuilder.js` — data mapping functions
 2. `ProposalSettingsScreen.js` — pricing + broker + settings
 3. `proposalPDF.js` — HTML builder + expo-print
 4. `ProposalGeneratingScreen.js` — loading screen
 5. `ProposalPreviewScreen.js` — preview + share
 6. `YachtProposalScreen.js` — entry + YachtSelector
 7. Photo page (optional, add last)
 8. Save to Supabase + My Proposals in Profile
-

IMPORTANT RULES

1. Use `yacht_proposal_template.html` as exact visual reference — do not redesign
2. System fonts only: Helvetica Neue, Helvetica, Arial, sans-serif
3. Add `-webkit-print-color-adjust: exact` — required for colored backgrounds in PDF
4. All monetary values: € 1,850,000 with space after € symbol
5. Only show spec rows where data exists — never show empty rows
6. Only show equipment groups that have at least one enabled item

7. If no price provided → show "Price on application" on cover
 8. If no broker info → hide broker contact box entirely
 9. If no photos → dark placeholder on cover, skip photo page
 10. PDF filename: `Proposal_${yachtName}_${date}.pdf`
 11. This tool does NOT use Claude AI — it's a pure document builder
 12. All text comes from user data — no AI-generated content
 13. Multilingual: field labels translate based on selected language
 14. Confidential stamp: if enabled → show "CONFIDENTIAL" watermark
-

MULTILINGUAL LABELS

```
