

REPLIT PROMPT — YachtWorth Charter Planner: Full Update

CONTEXT

Update the existing Charter Planner module in the YachtWorth app. Do NOT rebuild from scratch. Apply the changes and additions described below. All changes are to the CharterFormScreen and its P&L output.

CHANGE 1: DATE PICKERS — replace text input with calendar

All date fields must use a popup calendar picker, NOT manual text entry.

Fields to update:

- Start date
- End date
- Deposit date received
- Final payment date
- Contract signed date (new field)

Implementation:

- Use `@react-native-community/datetimepicker` (already available in Expo)
- Show as a tappable field with calendar icon:

 12 Jun 2026 ▼

- On tap → native date picker opens
- After selection → field shows formatted date: "12 Jun 2026"
- Duration (days) auto-calculates from start/end dates and updates live
- If end date is before start date → show validation error in red

CHANGE 2: VAT LOGIC FIX — add on top, not subtract

Current behavior (WRONG):

VAT is subtracted from entered charter price.

Correct behavior:

Charter price entered by user = BASE price (net, excl. VAT). VAT is calculated ON TOP and added to get gross total.

Base charter price (net):	€ 6,000	← user enters this
VAT (20%):	+ € 1,200	← calculated: base × VAT%
Total price to client:	€ 7,200	← shown prominently
VAT amount:	€ 1,200	← shown separately
Net revenue (for P&L):	€ 6,000	← used in all P&L calculations

VAT toggle:

```
APPLY VAT?
[No]  [Yes]
      VAT %: [____] (default 20%)

      Base:           €6,000
      + VAT (20%):    €1,200
      -----
      Total to client: €7,200
```

All P&L calculations use NET revenue (base price excl. VAT). VAT amount is shown separately in the Revenue section.

CHANGE 3: APA BLOCK — new section

APA = Advance Provisioning Allowance. A fund paid by the client IN ADDITION to the base charter fee. Covers all running costs: fuel, food, marina fees, etc. Managed by the captain. Unused portion is refunded to client.

APA Input:

APA

Apply APA? [No] [Yes]

APA percentage: [____] % (typical: 20-40%)
Motor yacht: 30-35%
Sailing: 20-25%

APA amount: € X,XXX ← auto-calculated: $\text{base_price} \times \text{APA\%}$
(shown in gold, updates live)

APA Expenses (shown when APA = Yes):

These are the actual costs drawn from the APA fund:

APA EXPENSES

Fuel	[_____]	€
Provisioning / Food	[_____]	€
Beverages / Alcohol	[_____]	€
Marina / Port fees	[_____]	€
Communications	[_____]	€
(satellite, WiFi)		
Crew gratuities	[_____]	€
Activities / Extras	[_____]	€
Description: [_____]		
Other APA expenses	[_____]	€
Description: [_____]		

Total APA spent:	€ X,XXX	(auto)
APA balance:	€ X,XXX	(green = refund to client)
	-€ X,XXX	(red = client owes more)

APA balance = APA amount – Total APA spent

- Positive → "Refund to client: €X,XXX" (green)
- Negative → "Additional payment required: €X,XXX" (red)

APA in P&L:

APA is NOT revenue. It passes through. Only show APA balance impact on P&L if there is an overspend that the owner absorbs. In Revenue section show:

Base charter (net):	€6,000	
APA received:	€1,800	← informational only, not profit
APA spent:	-€1,650	
APA balance:	€150	← refund to client

CHANGE 4: COMPLETE FIELD LIST (from reference spreadsheet)

Replace existing form fields with this complete list organized by section.

Section 1: BOOKING INFO

CONTACT (broker/agent who sent the booking)

[_____]

CLIENT NAME *

[_____]

CLIENT EMAIL

[_____]

CLIENT PHONE

[_____]

STATUS *

[Confirmed] [Tentative] [Option] [Cancelled]

CONTRACT

[Not signed] [Signed] [Sent]

Contract date: [ 17] calendar picker]

COMMENTS / NOTES

[_____]

Section 2: LOGISTICS

MOORING PORT (home base of yacht)

[_____]

PICK UP PORT *

[_____]

DROP OFF PORT

[_____]

☐ Same as pick up

TRANSFER FEE

[_____] €

Description: [_____]

Paid by: [Client] [Owner] [Agent]

CHARTER DATES *

Start: [17] calendar End: [17] calendar

Duration: X days ← auto-calculated

TIME / SCHEDULE

Departure time: [🕒] time picker]

Return time: [🕒] time picker]

Section 3: REVENUE & PAYMENTS

CHARTER RATE TYPE

[Fixed total] [Per day] [Per week]

CHARTER RATE (NET, excl. VAT) *

[_____] €

← if per day: × X days = €X,XXX total (auto)

← if per week: × X weeks = €X,XXX total (auto)

VAT

[No VAT] [Apply VAT]

VAT %: [____] (default 20%)

Base price (net):	€X,XXX
+ VAT (X%):	+€X,XXX
Total to client:	€X,XXX ← gold, prominent

APA

[No APA] [Apply APA]

APA %: [____] (default 30%)

APA amount: €X,XXX ← auto-calculated on base price net

TOTAL INVOICE TO CLIENT:

Charter (gross): €X,XXX

+ APA: +€X,XXX

TOTAL: €X,XXX ← largest number on screen

DEPOSIT

Amount: [_____] €

Date received: [ 17]

Status: [Received ✓] [Pending] [Overdue]

FINAL PAYMENT

Amount: [_____] €

Date due: [ 17]

Status: [Received ✓] [Pending] [Overdue]

REFUND (if applicable)

Amount: [_____] €

Reason: [_____]

Section 4: CREW & VESSEL

CAPTAIN

Name: [_____]

Day rate: [____] €/day

Captain total: €X,XXX ← auto (rate × days)

FIRST OFFICER / MATE

☐ Include

Name: [_____]

Day rate: [____] €/day

STEWARDESS

Count: [-] 1 [+]

Day rate: [____] €/day

Total: €X,XXX ← auto

CHEF / COOK

☐ Include

Day rate: [____] €/day

DECKHAND

Count: [-] 1 [+]

Day rate: [____] €/day

EXTRA CREW / OTHER

[_____] €

Description: [_____]

TOTAL CREW COST: €X,XXX ← auto

ENGINE HOURS BEFORE DEPARTURE

[_____] hrs

ENGINE HOURS AFTER RETURN

[_____] hrs

Hours used: X hrs ← auto

FUEL (if not covered by APA)

Liters: [_____] L

Price/liter: [_____] €

Fuel total: €X,XXX ← auto

EXTRA SERVICE

Description: [_____]

Amount: [_____] €

DAMAGE

Description: [_____]

Amount: [_____] €

Paid by: [Client] [Insurance] [Owner]

Section 5: INCOME DISTRIBUTION

This is the most important new section. Shows how the base charter net revenue is split between all parties.

INCOME DISTRIBUTION

Distribution type:

[By percentage] [By fixed amount]

BOAT OWNER

% or €: [_____] Amount: €X,XXX ← auto

AA COMMISSION (management company)

% or €: [_____] Amount: €X,XXX ← auto

AGENT COMMISSION (booking agent)

% or €: [_____] Amount: €X,XXX ← auto

OTHER PARTICIPANT

Name: [_____]

% or €: [_____] Amount: €X,XXX ← auto

[+ Add participant] ← button to add more rows

Total distributed: €X,XXX

Base net revenue: €X,XXX

Difference: €X,XXX ← must be 0, show warning if not

DISTRIBUTION RESULT (shown at bottom, always visible):

PAYOUT SUMMARY			
	Boat Owner	€X,XXX	(XX%)
	AA Commission	€X,XXX	(XX%)
	Agent Commission	€X,XXX	(XX%)
	[Other name]	€X,XXX	(XX%)
	Base net revenue:	€X,XXX	
	Total distributed:	€X,XXX	
	✓ Balanced		

Distribution validation:

- If total distributed $\neq$ base net revenue → show warning: " ⚠ Distribution does not match net revenue. Difference: €X,XXX"
- Warning shown in red, does not block saving

Default distribution (pre-filled, editable):

- Boat Owner: 80%
- AA Commission: 10%
- Agent Commission: 10%

Section 6: APA EXPENSES (shown when APA enabled)

APA EXPENSES BREAKDOWN

APA budget: €X,XXX

Fuel	[_____]	€
Provisioning	[_____]	€
Beverages / Alcohol	[_____]	€
Marina / Port fees	[_____]	€
Communications	[_____]	€
Crew gratuities	[_____]	€
Activities / Extras	[_____]	€
Description: [_____]		
Other	[_____]	€
Description: [_____]		

APA budget:	€X,XXX
Total APA spent:	-€X,XXX

APA balance:	€X,XXX	← green: refund to client
	-€X,XXX	← red: client owes additional

Section 7: P&L SUMMARY (auto-calculated, read-only)

P&L THIS CHARTER

REVENUE

Base charter (net):	€X,XXX
Transfer fee (if owner):	€X,XXX
Extra services:	€X,XXX

Gross revenue:	€X,XXX
----------------	--------

DEDUCTIONS

AA Commission:	-€X,XXX
Agent Commission:	-€X,XXX
Total crew:	-€X,XXX
Fuel (non-APA):	-€X,XXX
Damage absorbed:	-€X,XXX

NET PROFIT:	€X,XXX	← green/red
Margin:	XX%	

BOAT OWNER RECEIVES:	€X,XXX	← highlighted gold
----------------------	--------	--------------------

NOTE: APA is excluded from P&L (pass-through fund).

CHANGE 5: SUPABASE SCHEMA UPDATES

Add these columns to the `charters` table:

```
alter table charters add column if not exists contact_name text;
alter table charters add column if not exists mooring_port text;
alter table charters add column if not exists pickup_port text;
alter table charters add column if not exists dropoff_port text;
alter table charters add column if not exists departure_time text;
alter table charters add column if not exists return_time text;
alter table charters add column if not exists transfer_fee numeric default 0;
alter table charters add column if not exists transfer_fee_note text;
alter table charters add column if not exists transfer_fee_paid_by text default '
alter table charters add column if not exists contract_status text default 'not_s
alter table charters add column if not exists contract_date date;
alter table charters add column if not exists charter_rate_period text default 'f
alter table charters add column if not exists apa_enabled boolean default false;
alter table charters add column if not exists apa_percent numeric default 30;
alter table charters add column if not exists apa_amount numeric default 0;
alter table charters add column if not exists apa_fuel numeric default 0;
alter table charters add column if not exists apa_provisioning numeric default 0;
alter table charters add column if not exists apa_beverages numeric default 0;
alter table charters add column if not exists apa_marina_fees numeric default 0;
alter table charters add column if not exists apa_communications numeric default
alter table charters add column if not exists apa_crew_gratuities numeric default
alter table charters add column if not exists apa_activities numeric default 0;
alter table charters add column if not exists apa_activities_note text;
alter table charters add column if not exists apa_other numeric default 0;
alter table charters add column if not exists apa_other_note text;
alter table charters add column if not exists refund_amount numeric default 0;
alter table charters add column if not exists refund_reason text;
alter table charters add column if not exists extra_service_amount numeric default
alter table charters add column if not exists extra_service_note text;
alter table charters add column if not exists damage_amount numeric default 0;
alter table charters add column if not exists damage_note text;
alter table charters add column if not exists damage_paid_by text default 'client
alter table charters add column if not exists first_officer_name text;
alter table charters add column if not exists first_officer_day_rate numeric defa
alter table charters add column if not exists chef_day_rate numeric default 0;
alter table charters add column if not exists chef_included boolean default false
alter table charters add column if not exists deckhand_count integer default 0;
alter table charters add column if not exists deckhand_day_rate numeric default 0

-- Income distribution table (separate, linked to charter)
create table if not exists charter_distribution (
```

```
id uuid primary key default gen_random_uuid(),
charter_id uuid references charters(id) on delete cascade,
participant_name text not null, -- 'Boat Owner' | 'AA Commission' | 'Agent Comm
distribution_type text default 'percent', -- 'percent' | 'fixed'
percent_value numeric,
fixed_value numeric,
calculated_amount numeric,
created_at timestamptz default now()
);
```

CHANGE 6: PDF REPORT UPDATE

Update the charter PDF report to include all new sections:

1. Header: YACHTWORTH · CHARTER · date
 2. Hero: yacht name, dates, status, NET PROFIT large
 3. Client + Contact info
 4. Logistics: ports, transfer fee
 5. Revenue: base, VAT breakdown, total to client, APA
 6. Crew breakdown by position
 7. APA expenses if applicable + balance
 8. Extra services + damage if applicable
 9. Income Distribution table — who gets what
 10. P&L Summary
 11. Footer disclaimer
-

CALCULATION LOGIC (charterCalculations.js)

```
export function calcCharter(form) {
  const days = daysBetween(form.startDate, form.endDate);

  // Base price (net, excl. VAT)
  let baseNet = 0;
  if (form.rateType === 'fixed')    baseNet = form.charterRate;
```

```

if (form.rateType === 'per_day') baseNet = form.charterRate * days;
if (form.rateType === 'per_week') baseNet = form.charterRate * (days / 7);

// VAT – ADD on top, never subtract
const vatAmount = form.vatEnabled ? baseNet * (form.vatPercent / 100) : 0;
const totalToClient = baseNet + vatAmount;

// APA – separate fund, on top of charter fee
const apaAmount = form.apaEnabled ? baseNet * (form.apaPercent / 100) : 0;
const apaSpent = form.apaFuel + form.apaProvisioning + form.apaBeverages +
    form.apaMarinaFees + form.apaCommunications +
    form.apaCrewGratuities + form.apaActivities + form.apaOther;
const apaBalance = apaAmount - apaSpent; // positive = refund, negative = owes

// Total invoice to client
const totalInvoice = totalToClient + apaAmount;

// Crew costs
const captainTotal = (form.captainDayRate || 0) * days;
const firstOfficerTotal = form.firstOfficerDayRate * days;
const stewardessTotal = (form.stewardessCount || 0) * (form.stewardessRate || 0);
const chefTotal = form.chefIncluded ? (form.chefDayRate || 0) * days : 0;
const deckhandTotal = (form.deckhandCount || 0) * (form.deckhandRate || 0);
const totalCrew = captainTotal + firstOfficerTotal + stewardessTotal +
    chefTotal + deckhandTotal + (form.extraCrewCost || 0);

// Fuel (non-APA)
const fuelCost = (form.fuelLiters || 0) * (form.fuelPricePerLiter || 0);

// Income distribution
const distribution = calcDistribution(baseNet, form.distributionParticipants);

// P&L (based on NET revenue only, APA excluded)
const grossRevenue = baseNet + (form.transferFee || 0) + (form.extraServiceAmount || 0);
const totalDeductions = distribution.agentCommission + distribution.agentCommission +
    totalCrew + fuelCost + (form.damageAbsorbed || 0);
const netProfit = grossRevenue - totalDeductions;
const margin = grossRevenue > 0 ? (netProfit / grossRevenue) * 100 : 0;

return {
    days, baseNet, vatAmount, totalToClient,
    apaAmount, apaSpent, apaBalance,
    totalInvoice, totalCrew, fuelCost,
    distribution, grossRevenue, netProfit, margin,
    boatOwnerReceives: distribution.boatOwner,
};
}

```

```
function calcDistribution(baseNet, participants) {
  const result = {};
  let totalDistributed = 0;

  participants.forEach(p => {
    const amount = p.type === 'percent'
      ? baseNet * (p.value / 100)
      : p.value;
    result[p.name] = Math.round(amount * 100) / 100;
    totalDistributed += result[p.name];
  });

  result.total = totalDistributed;
  result.difference = baseNet - totalDistributed;
  result.balanced = Math.abs(result.difference) < 0.01;

  return result;
}
```

UI REQUIREMENTS

1. All monetary values: € 1,234.56 with space after €
 2. All % values: 30.0% with one decimal
 3. P&L numbers: green if positive, red if negative
 4. PAYOUT SUMMARY card: always sticky at bottom of Income Distribution section
 5. APA balance: green card if positive ("Refund to client"), red card if negative ("Additional payment required")
 6. Date fields: always show calendar icon, never raw text input
 7. Duration auto-updates immediately when either date changes
 8. All calculations update in real-time as user types
 9. "Save" validates required fields: client name, yacht, dates, charter rate
 10. Section headers are collapsible (tap to expand/collapse)
-

PRIORITY ORDER

1. Fix VAT logic (critical — wrong in production)
2. Add date pickers to all date fields
3. Add APA section with expenses breakdown
4. Add Income Distribution section + Payout Summary
5. Add all missing fields from spreadsheet
6. Update Supabase schema
7. Update PDF report with new sections
8. Update charterCalculations.js with new logic

YachtWorth Charter Planner — Full Update Reference: June-September 2025 charter calendar spreadsheet Columns: CONTACT · CLIENT · MOORING PORT · PICK UP/DROP OFF · TRANSFER FEE · TIME · PRICE · VAT · APA · FUEL · CREW TIPS · REFUND · BOAT OWNER · AA COMMISSION · AGENT COMMISSION · CONTRACT · EXTRA SERVICE · DAMAGE · COMMENTS
