

REPLIT PROMPT — Yacht Proposal: Equipment & Photos Fixes

CONTEXT

Two specific fixes only. Do not change anything else.

FIX 1: Equipment — vertical list, plain text, no tags or borders

Current problem:

Equipment items display as horizontal tags with borders and background colors.

Required result:

Each item on its own line, plain text with a dash prefix, no borders, no backgrounds, no tag styling.

CSS — replace existing eq-item styles:

```
.eq-items {
  display: flex;
  flex-direction: column; /* vertical, one item per line */
  gap: 0;
}

.eq-item {
  font-size: 8.5pt;
  color: #444444;
  padding: 3px 0 3px 14px;
  position: relative;
  border: none;           /* NO border */
  background: none;      /* NO background */
  border-radius: 0;      /* NO radius */
}

.eq-item::before {
  content: '-';
```

```

    position: absolute;
    left: 0;
    color: #cccccc;
}

.eq-item.hi {
    color: #1a1a1a;
    font-weight: 600;          /* bold for notable items only */
}

.eq-item.hi::before {
    color: #C5973A;           /* gold dash for notable items */
}

```

Result example:

```

NAVIGATION & COMMUNICATION
- Starlink Maritime          ← bold, gold dash
- Garmin chartplotter
- Furuno radar
- AIS transponder
- Simrad autopilot
- VHF radio DSC

```

FIX 2: Photography page — 4 photos in 2x2 grid

Current problem:

Page shows 2 photos on top row + 3 photos on bottom row. Bottom row photos are smaller than top row.

Required layout:

Exactly 4 photos in a 2x2 grid. All 4 photos the same size. Two on top, two on bottom.

```

function buildPhotosPageHTML(photoUrls, yachtName, pageNum) {
    if (!photoUrls || photoUrls.length === 0) return '';

    // Use first 4 photos only, all same size in 2x2 grid
    const photos = photoUrls.slice(0, 4);

    // Pad to 4 if fewer — repeat last photo

```

```

while (photos.length < 4) {
  photos.push(photos[photos.length - 1]);
}

const photoHeight = '62mm'; // all photos same height

const photosHTML = `
  <div style="display:grid;grid-template-columns:1fr 1fr;gap:8px;">
    ${photos.map(url => `
      
    `).join('')}
  </div>`;

return `
  <div class="ipage" style="page-break-before:always;">
    <div class="ih">
      <div class="ih-brand">YachtWorth</div>
      <div class="ih-right">
        <div class="ih-yacht">${yachtName}</div>
        <div class="ih-page">${pageNum}</div>
      </div>
    </div>
    <div class="ib">
      <div class="sec">
        <div class="sec-title">Photography</div>
        ${photosHTML}
      </div>
    </div>
    <div class="ifooter">
      <div class="footer-disclaimer">Photos representative of vessel condition
      </div>
      <div class="footer-brand">YachtWorth</div>
      <div class="footer-powered">Powered by PDYE Group</div>
    </div>
  </div>`;
}

```

FIX 3: My Yacht photo upload — allow up to 6 photos total

Current problem:

My Yacht profile allows adding photos but user wants 2 more slots (currently has photos, wants to add 2 more to reach a total of up to 6).

Fix in AddYachtScreen.js / PhotoSection.js:

```
// Change maximum photos from current limit to 6
const MAX_PHOTOS = 6; // was previously less

// In the "Add photo" button logic:
if (photos.length >= MAX_PHOTOS) {
  Alert.alert(
    'Maximum reached',
    'You can add up to 6 photos per yacht.'
  );
  return;
}
```

UI change — show remaining slots:

```
// Below the photo grid, show how many more can be added:
{photos.length < MAX_PHOTOS && (
  <Text style={styles.remainingText}>
    {MAX_PHOTOS - photos.length} photo{MAX_PHOTOS - photos.length !== 1 ? 's' : ''}
  </Text>
)}
```

The add button should always be visible as the last slot in the grid:

```
// Photo grid: show existing photos + one "+" add button if under limit
const gridItems = [
  ...photos,
  ...(photos.length < MAX_PHOTOS ? [{ isAddButton: true }] : [])
];
```

SUMMARY

#	Fix	Result
1	Equipment: vertical list, plain text	One item per line with — prefix, no borders or backgrounds

2	Photos: 2x2 grid, all same size	4 equal photos, 2 top + 2 bottom
3	My Yacht: allow up to 6 photos	User can add 2 more photos to existing set

Do not change anything else.
